## PLANS TO RECORD ALL CONSUMPTIVES

Health Commissioner Desires  
Cases to Be Under Supervision  
of His Department.

## NO PLACARD ON HOUSES.

Homes Where Disease Is Preva-  
lent May Be Subject to Rules  
of Hospitals—Favorable  
to Board.

After the meeting of the Board of  
Health yesterday an informal discussion  
on consumption was conducted by Health  
Commissioner Simon, and may be the  
first step toward checking the progress of  
the disease and the eventual establish-  
ment of separate hospitals for the treat-  
ment of those afflicted with tuberculosis.  
Doctor Simon laid down a plan, which  
calls for the supervision of all cases by  
the Health Department. It met with the  
favor of the board members, and will be  
taken up by Doctor Simon with the St.  
Louis Medical Society.

Doctor Simon's plan is to record each  
case as soon as possible, and by the ob-  
servance of rules laid down by the  
Health Department avoid the dissemination  
of the malady.

Under the plan homes of consumptives  
will become hospitals. It is not the ob-  
ject of the Health Department to placard  
such houses, as is the case in the treat-  
ment of scarlet fever and diphtheria, but  
to have a full history of the case at the  
Health Commissioner's office, the latter  
to have a voice in the treatment of all  
cases.

Rooms where the patients are confined,  
according to the plan, will be arranged  
according to directions of the Health  
Commissioner, and will be fumigated at  
intervals. These rules will, it is said,  
be very strict in the matter of caring for  
the afflicted.
